CPVC PLUMBING SYSTEM

Pipole CPVC pipes and fittings are manufactured using world class raw material and technology, which makes them ideal for both hot and cold water distribution systems. These pipes are made from a special plastic, chemically known as Chlorinated Polyvinyl Chloride, commonly known as CPVC. These pipes are a unique combination of high impact resistance, with no compromise in the pressure bearing capacity / tensile strength. These qualities lower the chances of cracks / damages while handling, during storage and installation.

- Ideal for hot and cold-water applications
We use **NSF Certified Raw Materials**.
- Suitable for water temperature upto 93°C
- Wide range of pipes and fittings from 1/2" to 4" (15 mm to 100 mm)
- Pipes & Fittings up to 2" (50 mm) can withstand 28.22kg/cm² pressure at 27°C and 6.95 kg/cm² at 82°C
- Safe for potable water, No bacterial growth
- Pipes upto 2" (50 mm) are manufactured as per IS:15778 specifications & fittings as per ASTM 2846 standards.
