

OUR PRODUCT RANGE

CPVC Pipes & Fittings

Pipole CPVC Pipes and Fittings are manufactured using the leading imported raw material which has the highest capacity to absorb the heat and ultimately increase the life of CPVC Pipes. CPVC Pipes are manufactured using Chlorinated Polyvinyl Chloride and are more flexible than PVC Pipes. Its uses include Hot & Cold Water delivery pipes and industrial liquid handling.

UPVC Pipes & Fittings

Pipole UPVC plumbing pipes and Fittings are made of Unplasticized Polyvinyl Chloride a low maintenance and low-cost material that is widely used in buildings for distribution of potable water, or water transfer in bathrooms, kitchens, sink, laboratories, etc.

SWR Pipes & Fittings

SWR stands for Soil, Waste and Rainwater Pipe for Building Drainage Systems. These pipes are installed outside the building and exposed to nature so these must be strong enough to handle nature. Pipole SWR Pipes qualify this requirement and these pipes are also Lead Free with highest material grade.

Agriculture Pipes & Fittings

Pipole Agriculture Pipes are self socketed at one end and plain on other. We have used lead free with the highest material grade to manufacture the quality product.

All types of Solvent Cement & Rubber Lubricants

Pipole Pipes quality of solvent cement has total influence on the joint strength and plays a very important role in solvent weld plumbing. Considering this important fact, our company procures the best chemicals for best solvent cement under its stringent quality checks. This ensures consistency in quality of solvent cement thereby reassuring the end user about the leak proof joints on a long-term basis. Solvent cement helps in strong & consistent joint between pipe & fittings.

CPVC, UPVC, SWR, AGRI

About Us -

Founded in the Year 2018, Shriram Industries is a Partnership Firm, owned by Mr. Ravi Yuraj Gupta and Mr. Yuraj Shankarlal Gupta. Both the Partners have wholeheartedly invested their time in setting up one of the best Manufacturing Facility for plastic fluid handling system used in residential, commercial and industrial buildings in a 3 tier City in the state of Maharashtra. It took almost 3 years to turn the Plant operational. We manufacture the Plastic Piping System with world class machineries and with all the latest technologies. The time period of 3 years invested to make the plant operation was just because we wish to build one of the Best Manufacturing Facilities in India.

Shriram Industries came into the market with the Brand Name – PipolE Pipes and with a wide range of Plastic Pipes and Fittings and this includes CPVC, UPVC, SWR and Agriculture Pipes and Fittings. We have one of the best extrusion & injection molding machines with the best Testing Lab Facility.

PipolE Pipes is of - “Smart People's Choice” who never compromise on quality to achieve customer satisfaction. Having all quality tests at one roof within our manufacturing facility as per international testing standards.

Leadership Team

Mr. Ravi Gupta is a Former Sales Analyst in Illinois Tool Works (ITW), USA – a Global Industrial Company. He worked in Pivotal Roles in Sales in Management Positions. ITW is a Fortune 200 Company and he was the Youngest Division Leadership Team Member for managing a product portfolio of \$ 160 Million (INR 1300 Crore). Our MISSION

To improve the Standard of Living of people with world class quality plumbing products at a very affordable cost and be an upcoming company who wishes to abolish the rivalry environment between the manufacturers and become the pioneer in bringing the unity amongst the manufacturers for global trade hub.

Our Vision

We believe that “Together We Can and Together We Will” . We believe in making our Distribution Network to grow with the same pace that of ours. We also ensure to deliver maximum customer satisfaction by providing the best quality product in the market. We believe in constant improvement in Manufacturing Processes, Facilities and of course Operational Efficiency.
